This field meeting was held to view and discuss the location of water, sewer and other utilities relating to their relationship with the District's sanitary sewer line replacement project under construction.

The District presented a description of the changes made in response to the actual location of the water, gas, and power lines found during the 'pot holing' for the project. The District requested feedback from THI regarding any changes they will be making to the water system based upon the 'pot holing' information discovered.

At 3:30 p.m. the meeting was disbanded.

Respectfully submitted
